

Air pressure lab

While science labs are fun, safety is always our primary concern. Please follow the guidelines on the *science lab investigation roles* sheet. Be sure you participate in the lab fully and record your observations on your own paper.

Barometer lab

Answer the questions on the lab sheet as well as any tables or information needed to assess this lab.

1. How did you uniquely contribute to the outcome of this lab?
2. How was your barometer different from the other groups?
3. What was your most challenging part of this lab?
4. What did you find the least interesting?

Impossible Plane

1. What did you think when you first saw the design of the plane?
2. What holds the plane in the air?
3. What did you find interesting about the plane or lab?
4. Had you done something like this before?

Punch a Potato

1. What did you think when you first saw the lab?
2. Could you pierce the potato without covering the end of the straw?
3. What kept the straw from collapsing?
4. What was interesting about the lab?
5. What was the least interesting part of the lab?
